## **MINI PROJECT REPORT**

On

**"IPL WIN PREDICTOR"**

## **BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING**

**Submitted to-**

**Mr. Shivam Singhal**

**(Department of Computer Science & Engineering)**

**Submitted by-**

**Student name : ANSHUL SHARMA**

**Roll No:2000680100057**

**5 th SEMESTER**

**DEPARTMENT OF COMPUTER  
SCIENCE AND ENGINEERING**

**MEERUT INSTITUTE OF ENGINEERING AND TECHNOLOGY, MEERUT**

## DECLARATION

We hereby declare that the project entitled -“**IPL WIN PREDICTOR**”, which is being submitted as Mini Project in department of Computer Science and engineering to Meerut Institute of Engineering and Technology, Meerut (U.P.) is an authentic record of our genuine work done under the guidance of Mr.“SHIVAM SINGHAL ” of Computer Science and Engineering, Meerut Institute of Engineering and Technology, Meerut.

Date: 16 NOVEMBER 2022

Place: MEERUT

ANSHUL SHARMA

2000680100057

## CERTIFICATE

This is to certify that mini project report entitled – “IPL WIN PREDICTOR” submitted by “Anshul Sharma” has been carried out under the guidance of Mr.“SHIVAM SINGHAL” of Computer Science and Engineering, Meerut Institute of Engineering and Technology, Meerut. This project report is approved for Mini Project (KCS 554) in 5<sup>TH</sup> semester in “MACHINE LEARNING” from Meerut Institute of Engineering and Technology, Meerut.

**Mr. SHIVAM SINGHAL**

**Date: 16 NOVEMBER 2022**

Certificate

## **ACKNOWLEDGEMENT**

I express my sincere indebtedness towards our guide Mr. "SHIVAM SINGHAL" of Computer Science and Engineering, Meerut Institute of Engineering and Technology, Meerut for his valuable suggestion, guidance and supervision throughout the work. Without his king patronage and guidance the project would not have taken shape. I would also like to express my gratitude and sincere regards for his kind approval of the project. Time to time counseling and advises.

I would also like to thank to our HoD Dr. "MUKESH RAWAT", Department of Computer Science and engineering, Meerut Institute of Engineering and Technology, Meerut for his expert advice and counseling from time to time.

I owe sincere thanks to all the faculty members in the department of Computer Science and engineering for their kind guidance and encouragement time to time.

Date: 16 NOVEMBER 2022

ANSHUL SHARMA

# DESCRIPTION OF MACHINE LEARNING :

Machine learning (ML) is a type of artificial intelligence ([AI](#)) that allows software applications to become more accurate at predicting outcomes without being explicitly programmed to do so. Machine learning [algorithms](#) use historical data as input to predict new output values.

[Recommendation engines](#) are a common use case for machine learning. Other popular uses include fraud detection, spam filtering, malware threat detect [business process automation](#) (BPA) and Predictive maintenance.

## NumPy and Pandas

NumPy stands for 'Numerical Python' or 'Numeric Python'. It is an open source module of Python which provides fast mathematical computation on arrays and matrices. Since, arrays and matrices are an essential part of the Machine Learning ecosystem, NumPy along with Machine Learning modules like Scikit-learn, Pandas, Matplotlib, TensorFlow, etc. complete the Python Machine Learning Ecosystem.

NumPy provides the essential multi-dimensional array-oriented computing functionalities designed for high-level mathematical functions and scientific computation. Numpy can be imported into the notebook using

Some of the important attributes of a NumPy object are:

- 1-Ndim:** displays the dimension of the array
- 2-Shape:** returns a tuple of integers indicating the size of the array
- 3-Size:** returns the total number of elements in the NumPy array
- 4-Dtype:** returns the type of elements in the array, i.e., int64, character
- 5- Itemsize:** returns the size in bytes of each item

The NumPy logo is a dark blue square with the word "NumPy" written in a light blue, sans-serif font in the center.

```
>>> import numpy as np
```

Similar to NumPy, Pandas is one of the most widely used python libraries in data science. It provides high-performance, easy to use structures and data analysis tools. Unlike NumPy library which provides objects for multi-dimensional arrays, Pandas provides in-memory 2D table object called DataFrame. It is like a spreadsheet with column names and row labels.

Some commonly used data structures in pandas:

**Series objects:** 1D array, similar to a column in a spreadsheet

**DataFrame objects:** 2D table, similar to a spreadsheet

**Panel objects:** Dictionary of DataFrames, similar to sheet in MS Excel.
